💾 Redis

Redis docker Container 실행

```
# redis 이미지 pull
$ sudo docker pull redis

# redis container 실행
$ sudo docker run -d -p 6379:6379 --name spring-redis redis

# redis server 접속
$ sudo docker exec -it spring-redis bash

127.0.0.1:6379> redis-cli
127.0.0.1:6379> AUTH ${spring.redis.password}

# redis 현재 키 값 확인 가능
127.0.0.1:6379> keys *
1) "page"
2) "page:0"
3) "page:1"
```

Spring boot & Redis 연동

```
// 스프링  의존성 추가(gradle)
implementation 'org.springframework.boot:spring-boot-starter-data-redis'

// application.yml수정
spring:
  redis:
    host: j8a701.p.ssafy.io
    port: 6379
    password: password
```
